## Describe the project in detail.

This project all about designing apps (iOS & Android) to reduce household food waste which allows

- #Grocery List - Groliste allows you to create / manage your shopping list smartly, it's suggests you day-to-day grocery items as you type, cross-off items as you buy them, move items to stock once you buy, and automatically categorize & group items to help & save your time while shopping.

#Family List Sharing - Groliste allows you to login from 5 devices (iOS/Android) using same login details and hence share everyhting among family members/friends

#Virtual Pantry - Groliste provides you Virtual Pantry as one-stop-shop for managing stocks effectively to cut food waste, it's allow to easily move your buy items to virtual pantry, set expiry date to items, maintain stock quantity, and notify you before items expire. Your Virtual Pantry accessible to all family and mates, no excuses to know what we have notified when entering item on the list that you already have

#Meal Planning - Critical step to minimize food waste is to plan your meals in advance and know what already in stock to cook these recipe. Groliste In-built Meal Planning Calendar view to help you to plan your meal with minimal input, simply pick a date and add recipe and their ingredients and see what is in stock and what to buy.

#Recipe Recommendation - Another step to cut food waste is to cook recipes from existing stock. Groliste uses smart technology to suggest recipes from existing stocks. Show same Premium features as screen shot in last.
